F.A.C.E.

Free African Children thru Education

Greetings to you all. We hope that you are encouraged by this update on what FACE was able to accomplish in 2025. Please note our new mailing address at the bottom of this newsletter.

Sponsorship of Students in Uganda

Through the generous financial support of our donors, FACE continued our core mission to provide funding that allows orphaned children to attend village Seventh-day Adventist schools.

In 2025, FACE sponsored 660 students at 33 SDA primary schools, and 32 students at 8 SDA secondary (high) schools, providing tuition fees, a school uniform, lunch, and school supplies.

FACE will be actively looking for ways to increase our donor base in 2026 so that we can assist children who are currently on a waiting list for sponsorship at other SDA primary schools.

Mamawi Atosketan Native School

Located just north of Ponoka, Alberta, the school provides a Seventh-day Adventist education to primarily Cree students from the surrounding Maskwacis community.

In 2023, FACE began a partnership with the school in response to a request from the principal for an urgent need for art supplies. Knowing that art plays an important role in indigenous culture by allowing children to express their stories and identity, and as a component of our mission to enhance the learning experience of children, FACE agreed to provide full annual funding of all art supplies for the elementary and high school students. This funding has had an immense impact on the art program, as expressed in this email received from the art teacher, “Thank you for your continued support! It helps us to continue inspiring the creativity of young minds and we are truly grateful.”

The Lobamba SDA Primary School in Eswatini

Construction of the grade 6 classroom was completed in December, 2025. Minor work to complete painting and installation of support posts for the roof had not been completed at the time of these photos.

The grade 3, 4, 5 and 6 classrooms constructed by FACE since 2022. The new computer lab building constructed by ADRA Netherlands is to the far left.

Our goal for 2026 is to begin and complete construction of the grade 7 classroom. To accomplish this, we need to provide funding of \$13,000. By completing this classroom, the Lobamba School will be able to provide a complete K-7 education for students in the community to receive their primary education. Enrolment at the school in 2026 is expected to be 125 students. The current grade 7 students will use the administration building, built by ADRA Netherlands, until they get their own classroom.

On behalf of the children that you support and the schools that you are helping to build, **thank you** for your generosity and your faithful support of **Free African Children thru Education, The Board and volunteers at FACE**
